

NEW YORK, March 7, 2024 /PRNewswire/ -- **Immunic, Inc. (Nasdaq: IMUX)**, a biotechnology company developing a clinical pipeline of orally administered, small molecule therapies for chronic inflammatory and autoimmune diseases, today announced participation in the following investor and scientific conferences in March:

- March 11-13: **Leerink Partners Global Biopharma Conference.** Daniel Vitt, Ph.D., Chief Executive Officer and President of Immunic, and Jessica Breu, Vice President Investor Relations and Communications, will participate in one-on-one investor meetings at this conference in Miami, FL.
- March 17-20: **Frontiers in Medicinal Chemistry.** Two abstracts have been accepted for poster presentations at this conference in Munich, Germany. The poster presentations will be accessible on the "Events and Presentations" section of Immunic's website at: <https://ir.imux.com/events-and-presentations>.
  - **Poster Title:** *Characterisation of Dual Nurr1 Activator/DHODH Inhibitor Vidofludimus Calcium and Development Towards a Nurr1 Selective Tool Compound*
  - **Presenting Author:** Christian Gege, Ph.D., Head of Intellectual Property at Immunic
  - **Abstract ID:** 11632\_36356
  - **Poster Board Number:** P039
- **Poster Title:** *Characterizing the Effects of NR4A Agonism in Neuroinflammation In Vitro*
- **Presenting Author:** Romy Busch, Department of Pharmacy, Center for Pharmaceutical Research, Ludwig-Maximilians-University of Munich
- **Abstract ID:** 11632\_36404
- **Poster Board Number:** P072

The posters will be presented during the whole conference. Poster sessions are planned as following:

- Poster session I: Sunday, March 17, 2024, 6:00 – 10:00 pm CET
  - Poster session II: Monday, March 18, 2024, 5:00 – 7:00 pm CET
- 
- March 25-28: **33<sup>rd</sup> Annual Meeting of the Society for Virology.** Two abstracts have been accepted for poster and oral presentations at this conference in Vienna, Austria. The presentations will be accessible on the "Events and Presentations" section of Immunic's website at: <https://ir.imux.com/events-and-presentations>.
    - **Poster Presentation:** *Preclinical Development of Host-Directed Dual-Target Small Molecule Inhibitors as Broad-Spectrum Antivirals*
    - **Presenting Author:** Alexandra Herrmann, Ph.D., Manager Translational Pharmacology, Immunic
    - **Abstract ID Number:** 107
    - **Program ID:** P 078
    - **Poster Session:** Antiviral Therapy and Resistance
    - **Date:** Monday, March 25, 2024
    - **Time:** 1:00 pm CET
  - **Abstract Title:** *Characterization of Mpox Virus Genomes and Patient Isolates From Franconia (Bavaria, Germany) and Antiviral Testing of Patient Isolates*
  - **Presenting Author:** Arne Cordsmeier, Ph.D., Institute of Clinical and Molecular Virology, University Hospital Erlangen
  - **Abstract ID:** 73
  - **Program ID:** O 106
  - **Oral Presentation Session:** Antiviral Therapy and Resistance 2
  - **Date:** Thursday, March 28, 2024
  - **Time:** 11:00 – 11:15 am CET

#### About Immunic, Inc.

Immunic, Inc. (Nasdaq: IMUX) is a biotechnology company developing a clinical pipeline of orally administered, small molecule therapies for chronic inflammatory and autoimmune diseases. The company's lead development program, vidofludimus calcium (IMU-838), is currently in phase 3 and phase 2 clinical trials for the treatment of relapsing and progressive multiple sclerosis, respectively, and has shown therapeutic activity in phase 2 clinical trials in patients suffering from relapsing-remitting multiple sclerosis, progressive multiple sclerosis and moderate-to-severe ulcerative colitis. Vidofludimus calcium

combines neuroprotective effects, through its mechanism as a first-in-class nuclear receptor related 1 (Nurr1) activator, with additional anti-inflammatory and anti-viral effects, by selectively inhibiting the enzyme dihydroorotate dehydrogenase (DHODH). IMU-856, which targets the protein Sirtuin 6 (SIRT6), is intended to restore intestinal barrier function and regenerate bowel epithelium, which could potentially be applicable in numerous gastrointestinal diseases, such as celiac disease, for which it is currently in preparations for a phase 2 clinical trial. IMU-381, which currently is in preclinical testing, is a next generation molecule being developed to specifically address the needs of gastrointestinal diseases. For further information, please visit: [www.imux.com](http://www.imux.com).

### **Cautionary Statement Regarding Forward-Looking Statements**

This press release contains "forward-looking statements" that involve substantial risks and uncertainties for purposes of the safe harbor provided by the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, included in this press release regarding strategy, future operations, future financial position, future revenue, projected expenses, sufficiency of cash and cash runway, expected timing, development and results of clinical trials, prospects, plans and objectives of management are forward-looking statements. Examples of such statements include, but are not limited to, statements relating to management's and employee's participation in investor and scientific conferences. Immunic may not actually achieve the plans, carry out the intentions or meet the expectations or projections disclosed in the forward-looking statements and you should not place undue reliance on these forward-looking statements. Such statements are based on management's current expectations and involve substantial risks and uncertainties. Actual results and performance could differ materially from those projected in the forward-looking statements as a result of many factors, including, without limitation, the COVID-19 pandemic, increasing inflation, impacts of the Ukraine - Russia conflict and the conflict in the Middle East on planned and ongoing clinical trials, risks and uncertainties associated with the ability to project future cash utilization and reserves needed for contingent future liabilities and business operations, the availability of sufficient financial and other resources to meet business objectives and operational requirements, the fact that the results of earlier preclinical studies and clinical trials may not be predictive of future clinical trial results, the protection and market exclusivity provided by Immunic's intellectual property, risks related to the drug development and the regulatory approval process and the impact of competitive products and technological changes. A further list and descriptions of these risks, uncertainties and other factors can be found in the section captioned "Risk Factors," in the company's Annual Report on Form 10-K for the fiscal year ended December 31, 2023, filed with the SEC on February 22, 2024, and in the company's subsequent filings with the Securities and Exchange Commission. Copies of these filings are available online at [www.sec.gov](http://www.sec.gov) or [ir.imux.com/sec-filings](http://ir.imux.com/sec-filings). Any forward-looking statement made in this release speaks only as of the date of this release. Immunic disclaims any intent or obligation to update these forward-looking statements to reflect events or circumstances that exist after the date on which they were made. Immunic expressly disclaims all liability in respect to actions taken or not taken based on any or all the contents of this press release.
